Abstract of DE19827623

Water vessel (1) with an internal filter cartridge (2), comprises basal arrangement of the water inlet opening (gap seen near base, 10) to the filter cartridge where the approaching water flow enters, before passing through the cartridge. The downcomer tube (5) guides filtered water to the lower outlet (through base 10). Preferably the downcomer (5) is internal to the cartridge. The internal base of the vessel has a holder for the cartridge, with appropriate passages.
